

APPLICATION FOR PERMISSION TO PLACE DEVICE AT BEAR LAKE

The bed of Bear Lake is state sovereign land, administered by the Utah Division of Forestry, Fire and State Lands (FFSL). In addition, the Utah Division of State Parks and the Utah Division of Outdoor Recreation have requirements to ensure navigational safety at Bear Lake. All devices placed at Bear Lake must have the approval of State Parks and Outdoor Recreation, as well as a valid permit from FFSL. This application and the fees described herein are required in order to begin the approval process.

Please complete and submit to the Bear Lake State Park Marina at least 60 days prior to anticipated placement.

**940 N. Bear Lake Blvd. (PO Box 184), Garden City, UT 84028
(435) 946-3343**

Legal Name			
Mailing Address		City	State
			Zip Code
Phone #		Email Address	
Is this a permit renewal? Y/N	Permit # (if renewing existing permit)		Signature

Number and Type of Device(s) to be placed:		
Pier(s)		Mooring Buoy(s) – (non-navigational)
Floating Dock(s) / Swim Platform(s)		Scientific/Research related devices
Fixed Platform(s) / Boat Lift(s)		Navigational Aids / Regulatory Markers
Shoreline Dock(s) > 75 ft from shore		Other (Please Explain)
Shoreline Dock(s) < 75 ft from shore		
Applicable Fees to Place Device(s) on Sovereign Lands (for use by single, upland landowners)		
Buoys (seasonal use): \$50 application fee plus \$50 use fee per buoy (maximum \$200 use fee).		
Floating Docks, Platforms, or Portable Piers (seasonal use): \$50 application fee plus \$250.00 use fee per dock/pier.		
Stationary Dock(s) or Pier(s): \$50 application fee plus \$350 use fee per dock/pier.		
Permits are valid for 3 years, beginning on the final date of approval and expiring December 31st of the third year		

Device Placement:		
Adjacent Upland Address*		
Geographic Coordinates (ie GPS)	Latitude:	Longitude:
*Applicants must provide proof of ownership of an adjacent parcel of land OR written permission must be obtained from the adjacent landowner or administrator and attached to this form.		
All temporary or seasonal devices (buoys, floating docks, portable piers, etc) must be completely removed from state lands and stored on private property between November 1st and April 30th		

See next page to provide a detailed device description

Description/Diagram of Device(s), Anchor(s) and Materials:

Please use this space to provide a complete description of the device(s) to be placed, including the device itself and the materials of which the device is constructed, the anchor, and anchor lines. Additional pages and/or photographs may be attached. Please refer to Appendix A for guidelines relating to acceptable devices to be placed on Utah’s boating waters. **Failure to provide adequate and appropriate detail will result in a denial of this application.**

APPENDIX A: REQUIREMENTS FOR BUOYS AND DOCKS ON BEAR LAKE

This appendix is intended to provide a general description of requirements for various devices placed at Bear Lake and other boating waters in Utah. These requirements are not unique to Bear Lake, but are based on national standards established by the United States Coast Guard (USCG) Aids to Navigation System (ATONS)

MOORING BUOYS:

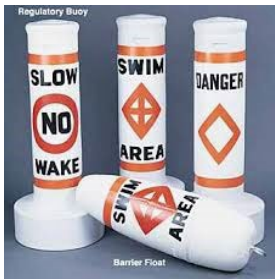

Mooring buoys are used to anchor/moor boats and/or floating docks. In compliance with national standards, mooring buoys shall be white, circular or cylindrical, and have a 2 inch, blue horizontal stripe.

All buoys must be identified with the last name of the applicant in 1 inch high (minimum) letters, visible above the water surface.

Any boat that is anchored/moored on the lake between sunset and sunrise shall display the boat's white, 360 degree anchor light.

REGULATORY MARKERS:

"Slow", "Wakeless Speed," "Boats Keep Out," "Swim Area," "Danger/Hazard" or other informational buoys and regulatory markers must meet United States Coast Guard (USCG) ATON standards.

Regulatory Markers and informational buoys must be a cylindrical "can" style with a minimum 9 inch diameter.

All regulatory markers must be identified with the last name of the applicant in 1 inch high letters visible on the buoy.

FLOATING DOCKS/SWIM PLATFORMS:

Floating Docks and Wheeled Piers attached to the shoreline must be located as near as possible to the center of the adjacent upland parcel and extend into the water at approximately a 90 degree angle to the shoreline.

Floating Docks and Wheeled Piers attached to shore and extending 75 feet or more into water shall display a white, 360 degree flashing light, approximately 1 meter above the surface of the water that meets USCG ATON standards.

Floating docks and/or swim platforms that are not attached to the shoreline and anchored or moored on the lake between sunset and sunrise shall also display a white, 360 degree flashing light, approximately 1 meter above the surface of the water that meets USCG ATON standards.

All docks, platforms, and piers must be identified with the last name of the permittee and last three digits of the issued permit number in 3 inch tall (minimum) letters visible on the end or side of the dock facing away from the shoreline, so that it can be viewed from an approaching boat.
